"A correspondent continues to telegraph as from Decatur, Ill , regarding gold discoveries near that city. We cannot but regard the whole thing as a grand humbug, perpetrated by oute sharpers for the sale of real estate. We predict this is about as it will turn out. Our only wonder is that our correspon-

Don't be too lavish in your predictions, friend Shuman. There have been mittee will be brought together at an doubting Thomasos in all ages of the world's history, and every great discovery has been mot with the same exhibition of skepticism and ridicule. There may not be gold here in paying quantities, but that the precious metal does exist on the Kepler farm and in its vicinity there seems to be no longer good reason to doubt.

Quera recently Charles Ploiffer was arrosted in San Francisco charged with the commission of numerous larconies of a potty character. On being a raigned the court permitted him to enter a plea of guilty to six charges of petit larcesy, and then senteneed him to pay a fine of \$200, or suffer one hundred days' imprisonment in each case, the terms to follow each other, so that the punishment for the second offense should commence on the expiration of that inflicted for the first, and so ou. Pleiffer elected to go to prison, as he regarded the fine excessive, but afterward weakened and paid the cumulative fine of \$1,200, the largest one ever collected in a potit larcony case. He was not wise. He should have corved out his one hundred days, and then resorted to Tweed's tactics. By that of the question whether cumulative punishment is legal on the Pacific coast.

Connectiour is now agitating the question of constitutional amendments. The House of Representatives, which alone has the power of initiating these amondments, has proposed five. The first limits the compensation of mem-bers of the Assembly to \$300 per an-afterward a third made its appearance num and mileage. The second increases the terms of judges of the Court of .Common Pleas to four years and of Police Courts to two yours. The third increases the terms of Judges of Probate to two years. The fourth provides for the canvassing of voters for elections in November. The fifth provides that a new town shall not have a Representative unless it has 2,500 and to "Coneral Natt Head," on the inhabitants and unless the town from which it is set off has 2,500 remaining. The third increases the terms of Judges which it is set off has 2,500 remaining. The amendments which have been proposed, however, are not so significant as one which was deteated, maniely, an amendment to prohibit the granting of State money to scetaring schools, which was indefinitely postponed by a strict party vote, thus placing the Democratic party on record es in favor of squandering the public funds for sectarian purposes. Should the matter, however, come to a practical issue in the State of Connections, the Democratic members of the Legislature would have ample; opportunity to discover they were not in accord with the sentiment of the people.

Hon. J. D. Cox, receiver of the Toledo, Wabash & Western road, in reply to a letter from a bondholder, gives the following information relative to the present financial condition of the read which will interest those holding its bonds: He says the not income of the company is sufficient to pay the interest on its first and second mortgage bonds, but by order of court it is to be first applied toward extinguishing a debt, mostly for labor and supplies, of about \$700,000, which had accrued when he took charge of the road. NEW York, July 27 .- The Evening

Post has the following in its financial columns The quietness of Wall street was broken; on the second hour of hustness, by the announcement that the banking house of Dunoin, Sherman & Co., had closed their doors and suspended payment A clap of thunder in a clear sky would not have caused more constornation, and at the stock exchange, gold exchange and outtle exchange there was great excitement Inside statement of liabilities is \$6,000, which have weakened this house are not entirely of recent making, but cover several years. The heaviest, it is understood, are in cotton, and the next in securities, which now have doubtful value. It is due to William Butler Duncan, that had he had a disposition house was sufficiently good to have ena-

The groutest excitement prevailed in largely and chiefly in cotton, also with rarious railroad outerprises. The senior partner returned from Europe, lately, and has been investigating the standing of the house with the result developed to day. Great sympathy is expressed for the firm. Their habilities are all every this country and Europe. The effect of the suspension of Duneap, Sherman & Co., upon the stock market, was much more serious for a short time than the circumstances of their failure, in their bearing on Wall street, ought to have created. > CHICAGO, July 27 .- The failure of New York firm of Duncan, Sherman & Co. has little effect here. Only two . ? i banks were connected with that house, and are involved to but a small extent. Duncan, Sherman & Co. are the financial agents of this city in New York but it is believed that the last payment on city tonds for which money has been forwarded to thom, has been man meonvenience On the board of trade the feeling was not more unsettled than it has been daily for the past ten days, and fluctuations of prices were sovere than usual

DR THOMAS NICHOLSON, of Louis, who has been giving special attention to the study of small pox for five years, claims to have discovered a specific which is destined to work a revolution in the treatment of this most loathsome disease, and rob it of half its torrors by preventing the forniation of pustales and consequent pitting of the surface, while at the same time reducing the danger of contagion. His theory is that the surface countion to take the chances, the credit of his is not caused by poison in the blood, but is due to the severe inflammation ever, he took an honorable course, and treatment is to restore as nearly as stopped while he had something to dis possible the normal condition of the skin by external application. For this purpose he uses the following proparation, in which it will be seen that gaseline ferms the principal ingredient Chasolino, one pint, gum emphor; as nuch as it will dissolve, pulverized sulphate of soda, one drachm; pure carbolic acid, half a drachm. The body of the patient is to be covered with gauze linen, over which the gasowith gauze linen, over which the gasoline compound is to be sponged frolly,
as occasion requires, after which the
body must be fanned to induce more
rapid evaporation. This process is to
be repeated till all signs of inflammation have ecased. Not only is the instense cutaneous heat reduced by this
operation, and a feeling of great relief
enjoyed by the patient, but the disgusting oder of the sick room is destroyed
and the dauger of infection reduced to
the minimum. If this discovery of

As a class we do not think the fashionable dry goods clerks are good traders-surely not, if they are all like t young salesman employed in this city. Yesterday afternoon "Windy William" Barnwell induced this hapless clerk to take a look at a "fine specimen" of a

horse which was standing in the alley in the rear of the establishment. The horse trader explained how decile the animal was, and how he would never run off, or anything of the sort. He would in time MAKE A GOOD FAMILY HORSE, ETC.

ted, but would fill out and be as fine a looking nag within a few weeks as could be found in the city, and he was a goer, too. These and many other similar remarks beguiled the luckless knight of the yardstick into the belief that he would make a big profit by accepting tion. the proffered offer of the jockey and trade his two silver watches and a massive chain for the animal. The horse man pocketed the levelry, and the dry goods clock load off his horse, or a puny sick-looking animal, which once, perhaps, might have been so termed.

The equine was rather lean, he admit-

The clerk lead his purchase to the alloy in the rear of the Priest hotel, where he tothered him to a post, and then stopped off a respectable distance to admire him. Several spectators gathered, and were congratulating the exult ing young exquisite on his good fortune, when the animal fell over, apparently dead. While the clock was lamenting his ill inck, Bill Barnwell appeared and offered 50 cents for the animal. This was refused, as it was thought he would bring more Mesold to the glue factory. Barnwell offered \$2, and was accepted whereupen he went up to the equind and did some good kicking on its ribs; remarking,

DE 18 NOT DEAD, BUT SLOWPETS. No one at first had any falth in this statement, but when he lead off the animal they were compelled to believe what their vision told them was true.-Barnwell chuckled; \$25 wasn't a bad day's work. The unhappy clerk returned to his place behind the counter, inwardly vowing never again to do any horse-trading. He will attend strictly to business until he accumulates enough cash to parchase another chronometer.

PROF. SPADER'S RESEARCHES.

Prof. R. H. Spader, of Atlanta, is in the city for the purpose of examining the gold fields of this section. He has made the mineral resources of this State a life study, and is theroughly posted in every detail. He proposes to remain a few days and examine the grounds in the neighborhood of Brush Creek, where the nuggets have recently been found. Prof. S. visited the Kepler farm yes

terday, but owing to the almost continuoue fall of rain, was prevented from making a satisfactory test, but he says that fine particles of gold could be seen with the naked eye, lying on top of the dirt. Where it comes from, or in what quantities it exists, he is not propared to say until he makes further investiga-It is hoped that our citizens will give

Prof. Spader such encouragement as will: enable him to pursue his investigations to a satisfactory result colther the finding of gold in paying quantities, or not finding it. The following notice of Prof. Spuder

is taken from a late number of the Chicago Evening John und : ''s Mr. R. H. Spader is the name of an earnest individual who has made it a life work to study the mineral wealth of llinois. He has thus far confined his lainois. He has thus far conflued his lat-bors to the shores of Sugar Creek, Logan county. In and about the; little stream the his really discovered gold, pearls and many other precious minerals. He has exhibited and received premiums at lo-ent and State fairs, and hopes to be able to extend his researches into other parts of the state that he may represent the of the State, that he may represent the natural wealth of Illinois at the I'hila-delphia Contennial. What he has ac-complished in this line is really surpris-ing, and he deserves help from those in-terested in scientific pursuits in still further pushing his investigations and proparing for the exhibition next year

Honaldson's Fate. - During an inter view with Mr Thomas, press agent of the Hippodrome, this morning, that gentleman expressed himself as being of the opinion that Donaldson and Grim wood are lost in Lake Michigan. Mr T. says that both himself and Prof. D. said all they could to dissuade Mr. Grimwood from making the ascension, which seems to have proved fatal. On account of the real estate Blanks, besides fifteen hundred direction of the wind Prof. Donaldson Deed and Martgago Blanks, printed on was of the opinion that the ascent would be attended with some danger, and he was careful to provide himself with ballast sufficient to enable him to get across other papers, promptly written, and the lake and land in Michigan; and, of course, every additional passenger lessoned the amount of ballast that could be discharged in case of danger. Mr Thomas speaks of Donaldson as being one of the best men he ever knew, and says, notwithstanding his connection with shows and public entertainments for so many years, he was never known not be torgetten, but should be agitated the Hippodrome, among whem he was a

THE RUSH TO KANSAS AND COLORADO.

The indications are that the rush to Kansas and Colorado will be greater that ever in 1874. The shortest way to reach the Far West is through St. Louis, the great Mississippi-Valley City, of over 460, 000 inhabitants, and thence west ever the St. Louis, Kansas City and Northern Short Line, which reaches all the great land Line, which reaches all the great land grante in the West, and runs six fast Ex-press trains, two more than any other read, between the Misslesippi and Mis-souri litvers. This road, in the last two souri iteyers. This rout, in the last years, has expended ever two unillion dellars, bosides earnings, in extraordinary improvement of roadway-in relaying its limit with best quality of new stocl and, non rails, on broad, now ties, and in passenger equipment, having substituted for ordinary cars new recilling their conclus, with ev-ery appliance for comfort and safety, beery appliance for comfort and safety, being elogantly carpeted and fitted with dressing rooms with total ing elogantry carpoted, and inted with dressing rooms, with tollet conveniences for ladies, gentlemen and, families traveling with children, free of any catra charge.
